DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 35-53, drawn to a game machine.

Group II, claim(s) 54-60, drawn to a method for playing a game on a gaming apparatus.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: that the Group I invention does not require a game control means arranged to directly or indirectly control images displayed on the display means and the making an election of a number of parallel drawn to be made simultaneously against the selected indicia as recited in claims of the Group II. The Group II invention does not require the game control means being arranged to play a game in which a player makes a selection of a series of indicia from a larger group of indicia, as recited in the claims of group I invention. Furthermore, groups I and II each has different modes of operation, different functions, or different effects including that as discussed above.

2. **If applicant elected Group I**, note that Group I invention contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Art Unit: 3729

Species 1A, where a player makes selection of a series of indicia chosen from a larger group of indicia.

Species 1B, where a player enters a selection of a series of numbers chosen from a larger group of numbers.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Claims 35-42 and 48-53 drawn to species 1A.

Claims 43-47 drawn to species 1B

There are no generic claims.

The species 1A and 1B listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Species 1A does not require to have a player to enter a selection of a series of numbers as required by species 1B. The species 1B does not require the player to make a selection of a series of indicia as required by species 1A.

Art Unit: 3729

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
